

Construction Management Consulting

MUSKUS MANAGEMENT CORPORATION

Muskus Management Corporation helps businesses leverage the management and control of their operations through the application of integrated tools, software and processes.

Construction Consulting focuses on your critical business functions and translates your unique information and data into useful measurement tools and processes.

We work with both new startups and established businesses to leverage their potential. For **new business startups** we provide consulting services to help them establish a framework for growth and profitability. For established firms, we assist business owners in analyzing their current operation and develop solutions to help them meet their business goals.

The services we provide include financial benchmarking, developing strategic banking relationships, strategies for estimating and bidding, certified payroll issues, developing proper accounting procedures, and general business consulting.

Based upon our client's business requirements, which are identified through a proven assessment process, we develop strategic operating solutions. Our expertise is in the application of integrated tools, software and processes to meet the identified needs of each client.

Muskus Management Corporation is a Milwaukee based firm that has been providing consulting services since 1990. We have proven solutions for the construction trade, wholesale distributors, retail operations, service businesses and non profit agencies.

Our engagement process includes:

- Initial Consultation/Assessment
- Solution Development
- Solution Implementation
- Training and Ongoing Support

Contact Muskus Management Corporation today and let us help you leverage your core competencies.
